Item No. 1: Questions and Answers

(Q) Do you have any existing utility or topographic survey of the project area, or will that be part of the task for the selected team to perform all of the necessary survey work?

(A) The City does not have any existing utility or topographic survey data of the project area. The City has some property boundary survey information for the IUH owned parcels and GIS data that can be shared with the design team following the award of this RFI. Surveying is listed as one of the work tasks in the RFI and will be a part of the Phase 1 East Project scope of work.
